

Critical Habitat for Bull Trout (*Salvelinus confluentus*)

Unit: 2, Puget Sound, Sub-unit: Lower Nisqually River

Where a water body is bordered on just one side by lands qualifying it for exclusion, it is excluded only to its midpoint.

Lateral Extent of Marine Critical Habitat: The inshore extent is the mean higher high-water (MHHW) line, including the uppermost reach of the saltwater wedge within tidally-influenced freshwater heads of estuaries. Marine critical habitat extends offshore to the depth of minus 10 meters (m) (33 feet (ft)) relative to the mean low low-water (MLLW) line.
